# TryHackMe Security Dashboard

4/4 selecte

Security Policy Feedback

You shared the prepared security policy with your colleagues and other departments and soon received the following feedback:

1. Anti-Phishing Solution

A bit pricy, but an excellent response since a lot of threats come through email!

2. Access Management Policy

Nice initiative! A good policy will make it harder for deepfakes to trick the IT support.

3. Security Awareness Program

Not a bulletproof solution, but educating the employees is always a great idea!

4. Antivirus Solution

An expensive but strong response to malicious phishing attachments or malware downloads.

Remediation Plan Feedback

You shared the prepared hardening plan with your colleagues and other departments and soon received the following feedback:

1. Security Training for IT

A well-informed IT team is less likely to leave the systems unprotected.

2. Patch Management Policy

An organized path management is a big step towards reducing the risk of exploitation.

3. Secure Password Policy

It's inconvenient, but it's the only way to protect against brute-force attacks.

4. Antivirus Protection

A simple and effective response to common threats like data stealers or USB worms.
